FRANCISCO
ALABAU CALATAYUD

Computer Science student

AI-assisted software development · Automation · Apps

Francisco Alabau Calatayud · Xesco

Profile

Third-year Computer Science student with a Higher Vocational Diploma in Cross-Platform App Development (DAM). I focus on software development, automation and using artificial intelligence agents to speed up how digital products are built. I have hands-on experience building apps, automating processes and speaking about AI applied to education.

Education

Higher Vocational Diploma in Cross-Platform App Development (DAM)

CEU

Completed before the degree

Bachelor's Degree in Computer Science

Universitat Politècnica de València (Vera Campus, Valencia)

1st and 2nd year at the Alcoi Campus.

Currently in 3rd year

Experience

Internship at Premea

Built software that automates document generation.

Customer service in Delaware (USA)

Customer-facing job during a summer in the United States.

Projects

Four apps of my own, from idea to App Store.

Aldiax

Learn to use AI with short, Duolingo-style exercises.

- An agent refreshes the AI news every day and builds levels from it.
- AI vocabulary and 100 free levels.
- Available in Spanish, English, Italian and French.

Expo · React Native · Supabase · Edge Functions con IA

Yunque

Habits to boost testosterone naturally.

- Free and paid versions.
- Home screen widgets to keep you on track.
- Everything stays on your phone: no accounts, no servers.

Expo · React Native · SQLite · HealthKit

ChatADN

Turns a WhatsApp chat into a visual story.

- Messages, reply times, most-used words and emojis.
- 100% on-device analysis: your chats never leave your phone.
- One-time purchase to unlock the Pro version.

Expo · React Native · RevenueCat

Una Neurona

A party game to find out who's the dumbest in the group.

- 100 minigames in 12 categories; each game picks 5 at random.
- Rooms for up to 8 friends and a joke IQ at the end.
- Free with ads, or a one-time payment to remove them.

Expo · React Native · Supabase en tiempo real · AdMob

Skills

No self-rated scores: for each skill, where I've actually used it.

Programming Python · Java · C/C++ · JavaScript/TypeScript
TypeScript in my apps and in the Aldiax web admin panel (Next.js).

App development
4 apps of my own built with React Native and Expo; 3 are already on the App Store.

Agent architecture and orchestration
An orchestrator agent hands work out to cheaper sub-agents to save tokens.

Shipping digital products
App Store, Supabase (database and Edge Functions) and Vercel, where this site lives.

AI agents for software development
I code with coding agents and my own rules in every repo (AGENTS.md). This site included.

Process automation
At Premea I automated document generation.

Prompt engineering
The Aldiax AI question generator: the AI proposes, I review before publishing.

How I work

I don't tie myself to a single language: I work with artificial intelligence agents and an orchestrator agent that splits the work among cheaper subagents, to optimise both development and token spend.

Talks

Talk for the teaching staff of IES San Vicente Ferrer

Topic: applying artificial intelligence in education.

November 2026

Learning and events

- Attending talks and tech industry events.
- Particular interest in Luis Ferrándiz's talk on digital consulting.
- Attending talks by Mateo Valero, founder of the Barcelona Supercomputing Center.

Languages

Spanish · native

Valencian · advanced

English · working proficiency, with international work experience (no official certificate)

Other details

- Category B driving licence.
- Available to give talks and collaborate on tech projects.

Shall we talk?

Place your order: a project, a talk or a coffee.
